Notes:

Est. Estimate

- # Please note that the additional weight of the tow bar and trailer nose weight increases the rear axle loading of the motorhome so care should be taken that the rear axle load is not exceeded when towing. To ensure adequate road holding, the load on the front axle, under all conditions, must not be less than 40% or more than 70% of the total weight. Care must be taken when distributing loads. Please see the Technical Handbook for permissible axle loads, the loadings and weights stated are maximums and must not be exceeded under any circumstances.
- ‡ The maximum trailer weight is limited by the Gross Train Weight which must not be exceeded. For example, if the vehicle is at the maximum MTPLM of 5000kg, then the maximum trailer weight possible is 1000kg. Reducing the weight of the vehicle by removing payload, will allow you to increase the trailer weight up to a maximum of 1600kg.
- * The maximum trailer nose weight is limited to 40kg.

We have worked with Alde since 1994 to help make our leisure vehicles feel more like home, testing our caravans and motorhomes down to minus 15°C to ensure you stay cosy no matter where the road takes you.

Swift partners with Oyster satellite TV and broadband to keep you entertained on the go. The permanently mounted dishes fold away when travelling, then locate the satellite signal automatically for efficient operation. Made in Germany with a dedicated UK service centre, the satellites come with a 3-year warranty.

Swift Group is proud to support a local charity the Daisy Appeal.

The Daisy Appeal gives loved ones faster, more accurate, diagnosis of three of the region's biggest killers – cancer, heart disease, and dementia.

The charity's aim is to provide a world-class PET-CT scanning facility which will provide a comprehensive clinical service, alongside an ambitious clinical research programme exploring new applications of imaging techniques.

Currently in the UK, most PET-CT scanning is carried out on cancer patients. However, it has great potential in various heart, neurological and other diseases. Many of these will necessitate the use of short half-life radioactive 'markers' which will need to be manufactured on site. Hence the requirement of a purpose built cyclotron, radiochemistry and radiopharmacy facility.

For every caravan, motorhome and holiday home sold, Swift Group make a donation to the Daisy Appeal, helping them to reach their goal of becoming the UK's number one PET-CT service.
